### **Self-Service Fueling Begins Today at John C. Tune Airport**

NASHVILLE, Tenn. – Self-service fueling is now available at the John C. Tune Airport (JWN), the Metropolitan Nashville Airport Authority (MNA) announced today. This brand-new fueling service is available to all customers of JWN, including the approximately 150 based customers, or those who have aircraft in hangars at the airport. On average, self-service fueling costs 50 cents per gallon less than full-service fueling.

“We’re excited to join a growing trend in general aviation airports that offer self-service fueling,” said Raul Regalado, president and CEO of MNA. “Self-service fueling is yet another convenient service we provide to our John C. Tune customers.”

Corporate Flight Management, a fixed-based operator, is providing the new service.

JWN is a general aviation airport located in west Nashville in the Cockrill Bend area. It serves the needs of regional corporate and private aircraft and is owned and managed by the Airport Authority.
